

Recap from 2^o Session – Early Adopters

- We talked about the experience by Early adopters
 - From Ecuador – facilitate the work of communities in Ecuador providing processing capabilities and sharing knowledge through the GeoHazard community
 - CNR – Facilitate collaboration, Integration with Zenodo, DOI
 - Marine pollution – what are rooms for improvement by external communities on services. Usability, Tags, Assessment tools as a mean of networking – need to be accurate.
 - Difficulty in finding data to merge (e.g. from Administrations), extension to non ES data to be merged with Env Data.
 - Extend use of Services to H2020 projects and to the social and industrial domain
 - Services accessibility, documentation and training as a core activity
