

# Recap from 1<sup>o</sup> Session – SDG9

- We have been talking about how services can help researchers managing
  - Data integration from different sources (e.g. In situ and Satellite data)
  - Immense amount of data: long term archives, extensive processing
  - Multidisciplinary scenarios
- Keywords:
  - Wider adoption what are the boundaries and constraints
  - Research Re-use (data formats? Learning curve)
  - Cross fertilization among different disciplines
  - Merging the work of different Earth Science communities
